GTP-2135-19

GTP-2135-20

### NEW DECALS

GTP-8262 SUMP DAILY red background white letters 3¼" x 2½"  
GTP-2135-19 FILTERS CHANGED black background with white letters, 4¼" x 11½".  
GTP-2135-20 WATER SLUG TESTED blue background with white letters, 4¼" x 11½".  
GTP-2135-22 DIESEL white background with red letters, 5" x 16".  
GTP-2135-23 FIRE EXTINGUISHER white background with red letters, 1½" x 13½".  
GTP-2135-24 PEEL AND STICK "NUMBERS SHEET" for GTP-2135-19 and GTP-2135-20 black background with white numbers.

The decals that are described on the front side of this bulletin are maintained in stock and can be shipped promptly.

The preparation of these decals is by a system that was developed by the 3M Company. It is called ScotchCal Type 3650 and is generally considered the highest quality, most technically advanced system available.

The film used to make these decals is white vinyl and is 0.003" (0.076 mm) thick. The backing paper is stiff enough to prevent warping so that the decal will maintain its shape during handling and shipping. The pressure sensitive adhesive is permanent and vandal resistant.

The vinyl inks are resistant to deterioration by sunlight but to provide maximum durability, a clear coating is applied after the printing process.

When applying these decals, care should be taken to insure that air bubbles are not trapped. To prevent this from happening, we suggest that the decal be laid on progressively from one end to the other. For best results, apply when the temperature is above 60°F (15°C). At temperatures between 40°F and 60°F (4°C and 16°C) wipe A-3 activator on the adhesive to make satisfactory application. A-3 Activator may be obtained from Gammon Technical. Never attempt to apply the entire decal directly; start at one end. If air bubbles are trapped, a stiff plastic object such as a spatula can be used to work the bubbles toward an edge.

The surface on which the decal is to be applied must be clean and dry as well as being free of wax, oil and fuel.

<b>DURABILITY</b>	6 years after application
<b>SHELF LIFE</b>	2 years @ 100°F (38°C) - not in sun light
<b>HUMIDITY RESISTANCE</b>	No effect from 95% relative humidity @ 100°F (38°C) for 500 hours
<b>SALT SPRAY TEST</b>	No effect from 20% concentration @ 95°F (35°C) for 200 hours
<b>JET FUEL RESISTANCE</b>	No effect - 24 hours @ 73°F (23°C)
<b>WATER RESISTANCE</b>	No effect - 144 hours @ 73°F (23°C)
<b>ADHESIVE STRENGTH</b>	4 lb/in (0,7 kg/cm) in 180° pullback test at 12" (30 cm) per minute @ 73°F (23°C)

**PIPE BAND KITS** are made to provide colored bands for marking pipes to API-1542. These kits use 4" wide bands long enough to mark pipes up to 6" in diameter. Use these band kits in addition to our identification decals such as GTP-2135-5 or GTP-3255A for jet fuel. Forget the paint brushes; these bands are neat, cheap and easy!

- GTP-3588-1 Pipe band kit for JET A fuel -- one black band
- GTP-3588-2 Pipe band kit for JET A1 fuel -- two black bands
- GTP-3588-3 Pipe band kit for JP-4/JET B fuel -- three yellow bands
- GTP-3588-4 Pipe band kit for AVGAS 100LL fuel -- one blue band
- GTP-3588-5 Pipe band kit for AVGAS 80 fuel - one red band

**PIPE IDENTIFICATION** and flow direction decals allow for easy marking; just cut off and rotate one arrow. Color coded for all fuels. Size is 15" x 2"

- GTP-3255A Flow and identification decal for JET A fuel -- white letters on black
- GTP-3255-A1 Flow and identification decal for JET A-1 fuel -- white on black
- GTP-3255-1 Flow and identification decal for AVGAS 100 fuel -- white on red and green
- GTP-3255-LL Flow and identification decal for AVGAS 100LL fuel -- white on red and blue

---

**NO SMOKING** and **FLAMMABLE** decals warn personnel around fuel systems, tanks and trucks of the fire hazard present - red letters on white

**NO SMOKING**

GTP-2135-1 6" x 26"

**FLAMMABLE**

GTP-2135-10 6" x 24"

**NO SMOKING**

GTP-2135-14 In-cab NO SMOKING - 1 1/2" x 7"

---

**NOZZLE BAND DECALS** are used on overwing nozzles to positively identify the fuel type. These band decals are made to the industry standard and are 7/8" x 10" long.

- GTP-3097 Jet Fuel - White letters on black
- GTP-3098 Avgas 100LL - White on blue with red edges
- GTP-3099 Avgas 80 - White on red

**EMERGENCY STOP** and **EMERGENCY FUEL SHUTOFF** decals are intended to be used in accordance with the NFPA 407 specification for fixed and vehical emergency stop controls. The specification calls out 2" high letters and the words PUSH, PULL or an arrow to indicate operation of the emergency stop switch. As you can see, we have included these instructions on two separate decals. Choose the style you prefer.

EMERGENCY STOP DECAL - GTP-834-29 - 6" x 20" - white letters on red background

EMERGENCY FUEL SHUTOFF DECAL - GTP-834-32 - 8-1/2" x 20" - white on red

The **LABEL DECAL**, as you can see, has over 50 labels which can be cut with a pair of scissors and used as necessary. The advantage is fourfold.

1. Low cost per label.
2. Easy installation and clear identification.
3. Long life and durability.
4. Easy replacement when necessary.

Due to the low price of the label, even if you only use a quarter of the sheet, you come out ahead. Labels can be cut out and used differently than shown. For example, the SUMP DAILY sticker can be cut in half and combined with the BEFORE FUELING decal to read SUMP BEFORE FUELING.

RED LIGHT WATER IN SUMP	RED LIGHT HEATER ON	RED LIGHT HIGH PRESSURE DIFFERENTIAL	ELEMENTS NOT INSTALLED		FILLED	CLOSED	BEFORE FUELING			
HEATER LIGHT	HEATER OVERHEAT	PUSH TO START	PULL	OUT	OUT	OUT	BOTTOM SUMP DAILY	BEFORE FUELING		
PUMP	UNDERWAY	OVERWAY	IN	IN	IN	RED LIGHT PUMP ON	EMERGENCY	EMERGENCY	NOZZLE RETURN	POWER SHUTOFF PUSH-UP
OPEN	DAILY	DAILY	SAMPLE OUTLET	SAMPLE OUTLET	SAMPLE INLET	CLAY	FIRE FILTER	NOZZLE PRESSURE	NOZZLE RETURN	
OPEN	PRESSURE CONTROL	MANUAL SHUT	OVER LIGHT	SAMPLE OUTLET	SAMPLE INLET	SAMPLE INLET	PRIMARY PRESSURE	SECONDARY PRESSURE	FILTER BREAKER	POWER SHUTOFF PUSH-UP

LABEL DECAL - GTP-834-28 - 6" X 22" - white on red

We offer a wide range of fuel system handling decals. These decals are all printed on top quality 3M® decal stock for long life and ease of use. See the last page for specifications. Cheap decals fade and peel, but these decals will last for many years when properly applied.

**IDENTIFICATION DECALS** are large and provide clear marking for trucks, fuel farms and tanks. 4" x 16". Color coded for all fuels.

GTP-2135-5 5" x 16"

GTP-2135-2 4" x 16"

GTP-2135-5 JET A - White letters on black  
 GTP-2135-6 JET B - White on black  
 GTP-2135-7 JET A1 - White on black  
 GTP-2135-2 AVGAS 80 - White on red  
 GTP-2135-3 AVGAS 100 - White on green  
 GTP-2135-4B AVGAS 100LL - White on blue  
 GTP-2135-4R AVGAS 100LL - White on red/white stripe  
 GTP-2135-18 AVGAS 100LL - White on red/blue stripe  
 All AVGAS 100LL decals are 5" x 16"

GTP-2135-7 5" x 16"

GTP-2135-3 4" x 16"

GTP-2135-6 5" x 16"

GTP-2135-4 5" x 16"

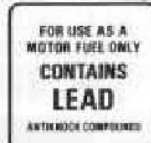

**MARKER DECALS** are made to provide marking for specific requirements.

GTP-2135-8

GTP-2135-13

GTP-2135-9

**BRAKE OVERRIDE**

GTP-2135-15

GTP-2135-8 1203 DOT marker for gasoline and kerosine - red and black on white - 11" x 11"  
 GTP-2135-13 1863 DOT marker for jet fuel only - red and black on white - 11" x 11"  
 GTP-2135-9 Contains lead - for Avgas and leaded gas dispensers - black on white - 6½" x 6½"  
 GTP-2135-15 In-cab brake override - black on white - 2½" x 15"
