## HEAD PROTECTION

### Ratchet Suspension

Hard Hats with Ratchet Suspension all meet the applicable requirements of the ANSI Z89.1-2003, Type I, Classes E (Electrical) and G (General). The applications that make these hard hats ideal are construction work, trimming tree branches, and overhead electrical hazards. Some of the hazards that are implemented with these hats include overhead falling objects and electrical shock. This is a top seller in head protection that features an easy-to-use, fast-to-adjust ratchet suspension. The hat has a lightweight, rugged polyethylene shell, and it is balanced on the head by continuous loop nylon fabric suspension straps. You can identify this head protection easily by the "V" on the top and customize it to fit your company's needs and make yourself stand out amongst the crowd. These hats are sold separately and they are preferred by the pros.

### Staz-On® Suspension

Hard Hats have a polyethylene shell and suspension system that work together as a protective system for one of the most important parts of the body. The Staz-On pinlock suspension system features a shock-absorbing 4-point suspension with headband, nape strap, Cushionaire sweatband, and adjustable crown straps. The hard hats are also compatible with welding helmets, faceshields, as well as ear muffs. These helmets meet and often exceed the applicable requirements that are set by ANSI Type I helmets, which is outlined in ANSI Z89.1-2003. These hard hats are SEI certified and are sold individually. This type of head protection is a top seller for many industrial applications because it offers a strong, comfortable, and durable choice in safety.

### Full-Brim Hard Hats

The Full-Brim protective hard provide many advantages over the traditional hard hats with their wide brim that extends over the neck and the ears, helping to reduce the amount of harmful UV radiation that can come from the sun. These hard hats met all of the requirements from ANSI Z89.1-2003, Type I, Classes E (Electrical) and G (General). These pieces of head protection are tested to provide people with extra protection from a force that is roughly equivalent to a 16oz. hammer dropping 40 feet. Applications for these hard hats include construction, trimming tree branches, and overhead electrical hazards. Make sure to ask about customizing these full brim hard hats that are sold individually.
